

## Winterton TC

16<sup>th</sup> October 2018

- **Multi Agency ASB meeting**

We arranged for the Multi Agency meeting to engage with partnerships following complaints of ASB in areas of Winterton. The meeting, chaired by the leader of the Council, was well attended by representatives from Humberside Police, Winterton Town Council, North Lincolnshire Council, MP, Winterton Rangers, Winterton Community Academy and Youth workers. The meeting was well received with many actions points taken away by attendees, to report back at the next meeting on 7<sup>th</sup> November.

One of the most important messages from the meeting is that residents need to report all issues on the 101 number. The more information they can give the better eg colour/make of motorbike/ colour of helmet, girl or boy offender etc. Issues can be reported anonymously on crimestoppers etc.

- **Coates Ave proposed development**

We were advised by the planning officer for this application that there is potential that the application could be heard at the November Meeting but depending on the responses received if further information is required this may delay things.

- Further to the query at last month's Town Council meeting re how many doctors are necessary per capita of population, the information we received via the Director of Public Health is as follows.

We are not aware of a guideline maximum population per GP practice in North Lincolnshire. Spatial Planning officers have been liaising with the CCG to try to establish a clear picture of our primary care estate, workforce, and populations served, thereby identifying where there is capacity and where new housing developments would require investment to increase primary care provision via Section 106 agreements. An external organisation, CityCare, have been undertaking an Estate Review for the CCG but this project seems to have been delayed and has not yet reported. When it does we will have a clearer idea.
